Sydney

AWISA 2018 is organised by the Australian Woodworking Industry Suppliers Association Limited to provide suppliers with the opportunity to present and sell their products to the Australian and New Zealand woodworking and furniture industries. The exhibition has been held regularly since 1988 with the 2018 exhibition being the fifteenth of these well-supported and successful exhibitions.

In 2018, with the opening of the ICC Sydney Exhibition Centre, the AWISA exhibition moves back to Darling Harbour, Sydney, the same location that previously hosted the biennial AWISA exhibition from 1992 to 2012.

THE EXHIBITION

MACHINERY, TOOLING AND SOFTWARE

The majority of the space at AWISA 2018 will be allocated to companies exhibiting panel processing, solid wood and timber machinery, tooling, manufacturing software, plus ancillary products such as dust extraction and materials handling equipment.

This part of the exhibition will be the place for the cabinet, kitchen, furniture, joinery, timber, fit-out and panel industries to visit to select new equipment.

AWISA - DESIGN

The AWISA - Design area was introduced at the 2012 exhibition as a separate area for products presented by suppliers of hardware and decorative products. It has been a stand out success, and is possibly the best-presented interior design show in Australia.

The hardware, decorative products and design software exhibited at AWISA have increased in sophistication over the years, as has the quality and size of the displays of these products. Coinciding with this has been the increasing importance of the design community to this sector of AWISA's membership. By creating the separate AWISA - Design area, AWISA puts emphasis on the exhibition's strong design component. This makes the exhibition attractive to architects and interior designers as well as the traditional AWISA visitor.

SYDNEY

AWISA 2018 - PROMOTING THE SHOW

AWISA's quarterly trade magazine will be the main publicity vehicle for the exhibition, but AWISA will also advertise in other trade magazines with strong distribution to the panel, solid wood and timber industries, and publications for architects and interior designers. Exhibitors will be provided with invitations to distribute to their clients. AWISA will also undertake social media and direct mail campaigns and will have a comprehensive website for the exhibition.

AWISA 2018 - THE VENUE

ICC Sydney at Darling Harbour is Sydney's new convention, exhibition and entertainment precinct built on the site of the old Sydney Convention & Exhibition Centre. The ICC Sydney Exhibition Centre has a total exhibition capacity of 35,000 square metres. AWISA has booked 19,000 square metres of this space.

The venue's prime waterfront location has all the benefits of the old venue. Close to thousands of hotel rooms and close to Sydney's central business district. The perfect location for international and interstate visitors, many of whom spend two or three days at the exhibition. Also a great location for those exhibitors planning evening social activities with their clients.

Visit www.iccsydney.com.au for more information about ICC Sydney.

AWISA - THE ASSOCIATION

The exhibition is organised as a service to members of AWISA. New exhibitors must first become members of the association. Membership applications are welcome from Australian based companies, and from overseas companies with Australian agents or distributors that are also members of AWISA.

AWISA was formed in 1986 by the principal suppliers to the Australian woodworking industry. The main aims of the association are to present industry exhibitions, publish industry magazines, co-operate with other organisations in the industry, and to encourage high ethical standards.

AWISA EXHIBITIONS - SOME HISTORY

AWISA 2016 in Melbourne was visited by 8682 people. Since 1992, AWISA exhibitions in Sydney have had, on average, 8250 individual visitors attend each exhibition. The more impressive statistic is the number of visitations, which counts attendees every day they attend. The number of visitations has averaged 10,900 or 32% higher than the number of individuals who attended, which means that a third of the visitors attended for a second day. This is an unusually high figure for an Australian trade show. On average 40% of visitors travelled from interstate or overseas. Two-thirds of attendees have been company owners, directors or managers, or in production or manufacturing management roles.
