

AWISA 2020

1-4 July 2020
ICC Sydney Exhibition Centre

FLOOR PLANS

Please note that when applying for space in the initial space application process that an application is for a square metreage of space, not for a particular location. See covering letter.

The AWISA Wood & Panel Processing floor plan (Level 1) has been changed from the 2018 plan.

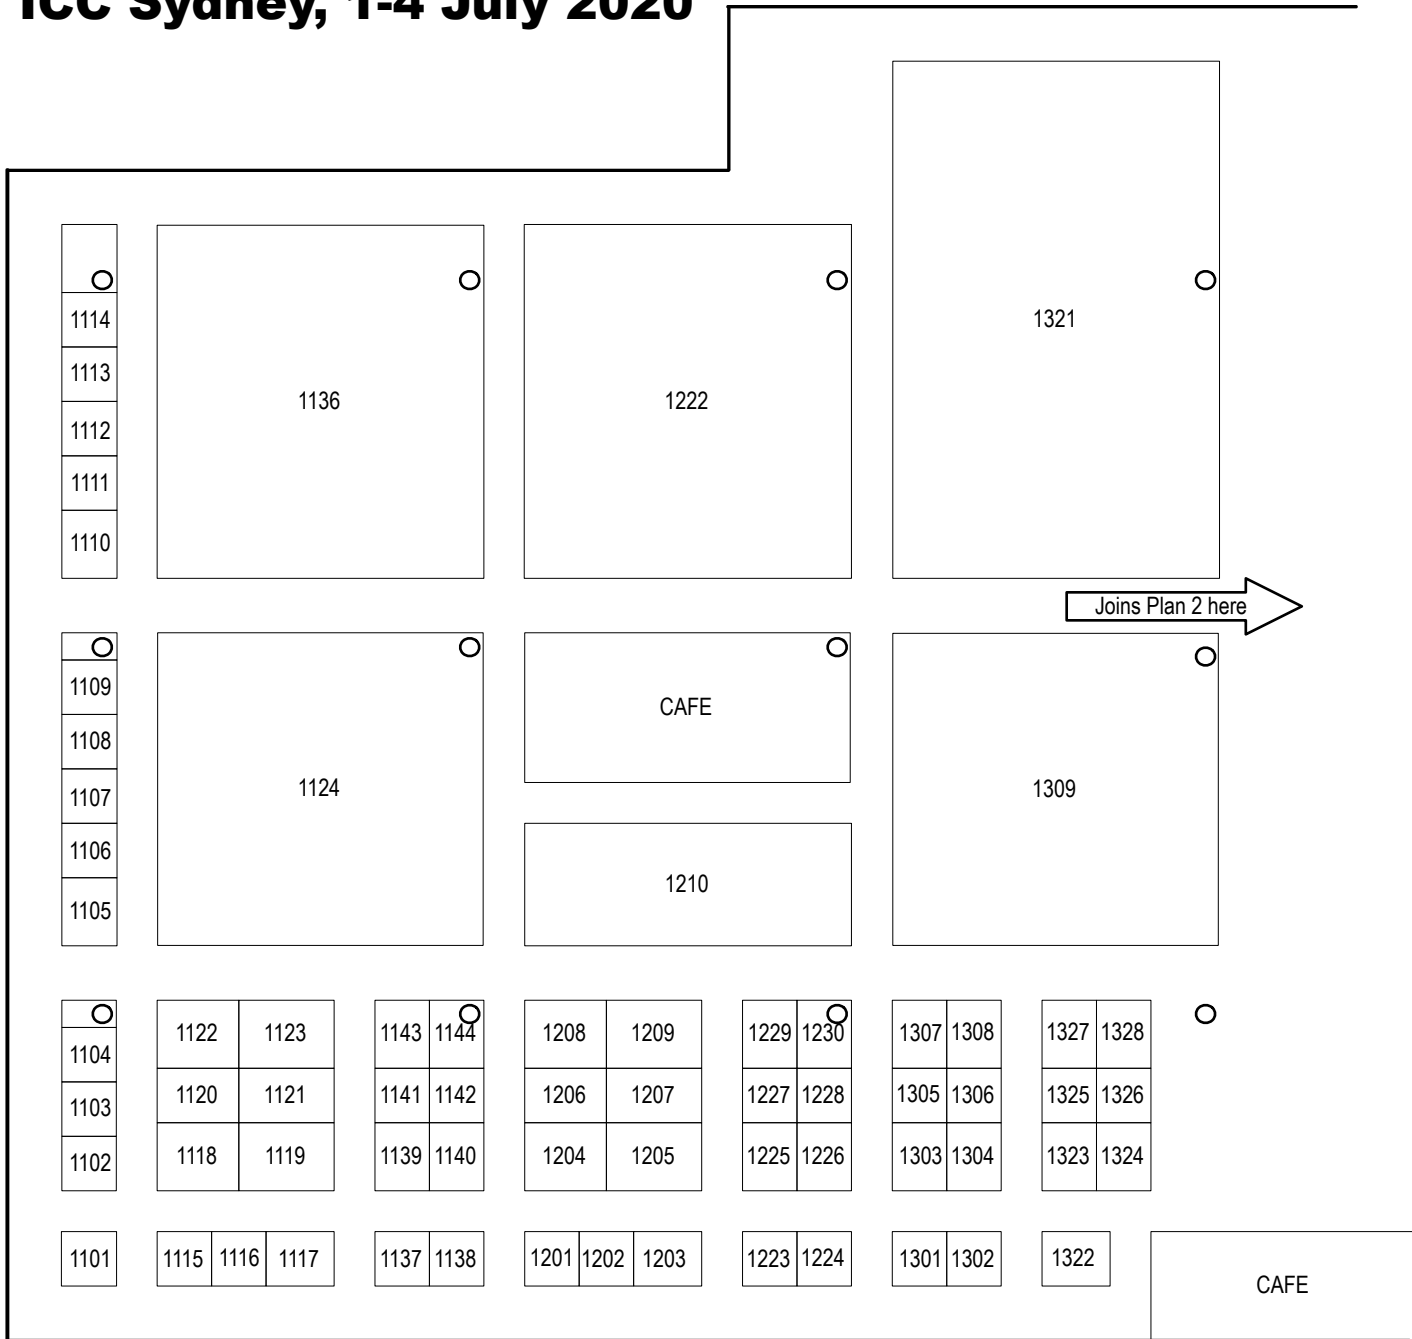

Pillars are no longer in the middle of aisle intersections. On the large blocks at the rear of the plan the pillars are on the edge of the blocks. The two major aisles running left and right are now 4 metres wide. The cafes at the front have been reduced in size but two cafes have been added within the stand areas at left and right. All aisles will be carpeted. All this is being done to improve the circulation of visitors through the show.

These floor plans maybe subject to change when major exhibitors choose their space.

Exhibitors are bound by the AWISA Ltd constitution and the rules of the association, and the association's terms and conditions.
